

MAJOR PROJECT  
PRESENTATION  
2020-21

**Online Course  
Enquiry  
Management  
System**

## INTRODUCTION :-

- A course enquiry management system (CMS) is a collection of software tools providing an online environment for course interactions.
- With the help of this system you can choose the course and the faculty according to your own.

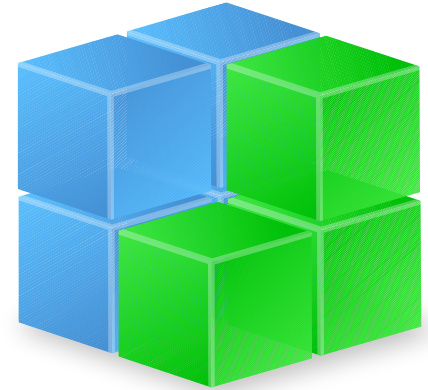

# Problem Statement :-

- If you go to school, college or job and coaching also it takes all your day and you don't have time for self study.
- Offline courses waste time in traveling from home to coaching also.
- Offline courses are more expensive then online courses.

# ABSTRACT :-

- The purpose of course enquiry management system is to provide a platform to those people who want to learn new skills along with their jobs or school.
- Online learning usually has more flexible timescale as compare to offline learning.
- Course enquiry management system can lead to error free, secure, reliable and allows for better budget management.

- The future scope is to provide study material with their courses.
- And we provide institute's location also.
- In future we will add all type to institute of Madhya Pradesh including MPPSC.
- We will also provide study planner for students who are confused about their future and we'll also provide mock tests.

Future Scope

## Service

### From Concept to Creation

The OCMS will likely not only have different modules, but also allow you to select which of these modules youâ€™ll be using in the class. If youâ€™re not going to use a particular module (e.g., if you decide not to use online chat during the course), you should turn that module off so that it doesnâ€™t distract students from the modules you plan to use.

### You Dream it, We Build it

Do you expect the course schedule as given in the CMS at the beginning the semester to remain basically the same (as one might expect a paper syllabus to remain basically the same), or do you rather plan to take advantage of the online environment to modify the syllabus as you work through the semester? Again, make your intentions clear to the students, and consider a commitment to tell them when you make changes to the syllabus.

### We Make WoW, Happen

The CFT provides technical and pedagogical support for instructors using Blackboard, Vanderbiltâ€™s course management system. CFT staff are available to consult with individual instructors, as well as departments and programs, on ways Blackboard can support effective teaching in both face-to-face and blended learning environments.

## OUR BEST INSTITUTE

OUR SATISFIED CUSTOMER SAYS

Universal Informatics is an ISO 9001:2008 Certified, process driven IT Services Company, offering a wide range of end-to-end services in the IT.
